Faleemi

NOTE **Before configuring your camera, please read the points below.**

- Please make sure the camera is in the same room, close to the router, before performing the setup. You can relocate it to where you want after it is all set up. You just unplug it and move it to the new location and plug it in, the camera will connect to your WiFi automatically, no need to set it up again.
- Please make sure your phone is connected to your **2.4GHz WiFi (not cellular data and 5GHz WiFi)** before doing the setup. Your 2.4GHz WiFi name (SSID) must be different from your 5.0GHz one.
  Please make sure your WiFi name and password do not have the special characters " **&** " and " **'** "(apostrophe).
  If you are not sure, please go to your router settings to find this out.
  Note: THIS WILL NOT AFFECT THE 5GHz WIFI USE OF YOUR OTHER WIRELESS DEVICES :)
  If you don't know how to go to your router settings, please visit our website **www.faleemi.com/blocks/router** to find the instructions or contact us at **support@faleemi.com**.
- If you don't see the **blue light** ☀️ , please do a "**Factory Reset**". This process is outlined on **Page 28** of this manual. ["**5. How to reset your camera (restore to factory default)?**"].

Now, please follow below instructions to get your camera set up.

Pan/Tilt Wireless Security IP Camera Model: FSC776B/W

Quick Start Guide

FALEEMI ®
Smart · Reliable · Secure

Setup Option 1 WPS/QSS Button Setup

Please check if your WiFi router has a "WPS/QSS" button or a WPS icon (See below picture). Please check your router's top, 2 sides, back or bottom. If you find it, please follow below steps to do the setup.

> **NOTE**
> **If you don't find it, there are still 2 options for you to set up the camera.**
> **Please turn to Page 5 for Setup Option 2: One Key WiFi Setup**
> **or Page 9 for Setup Option 3: Add cameras via WiFi configuration guide.**

WPS: Wi-Fi Protected Setup (Wi-Fi Simple Config) is a network security standard to create a secure wireless home network, The standard emphasizes usability and security.
WPS/QSS

WPS Button

WPS Icon

1. Please **put your camera close to your WiFi router** and plug it in, you will hear **"Beep"**. The camera is initializing by rotating from left to right and up to down and stop in center finally. And then you will see the red and blue lights are blinking slowly.
> Note: when the camera is startup, it will sound one **"Beep"**

DC 5V
**2.** Please press down the reset button for about 3~5 seconds and then let it go.

> ⚠ **CAUTION: The button is small. Holding for longer than 10 seconds will reset the camera.**

Solid Light

Press down
WPS/Reset
Button
3~5s

And then you will see the blue light turns on, solid and steady (not blinking).

3. When you see the solid blue light ☼ , please press the WPS button for 3 seconds on your router before 30 seconds has passed.

WPS/QSS
You will see the blue light on the camera blinking very fast and then hear **2 Beep**. The camera is connecting to your WiFi.

Beep
Beep

4. Wait for around 30 seconds until you see the blue light is flashing slowly again. And follow **Page 7** to add the camera to your mobile/tablet Faleemi APP.

🛠 Troubleshooting

1. If you see the blue light goes off instead of solid on, the WiFi password you just input may be wrong. Please reset the camera (instructions in **Page 28**) and do the setup again.

2. If your WiFi password was correct but still failed, the WiFi you were connected may be 5GHz WiFi.

3. If all your WiFi and password were correct, it is still failed, there may be the special characters apostrophe (**'**) and ampersand (**&**) in your WiFi SSID or password.

5. And follow **Page 7** to add the camera to your mobile/tablet Faleemi APP.
One Key WiFi

Add the connected camera to Faleemi App

*Please make sure the phone is connected to the same WiFi as the camera you've connected to.
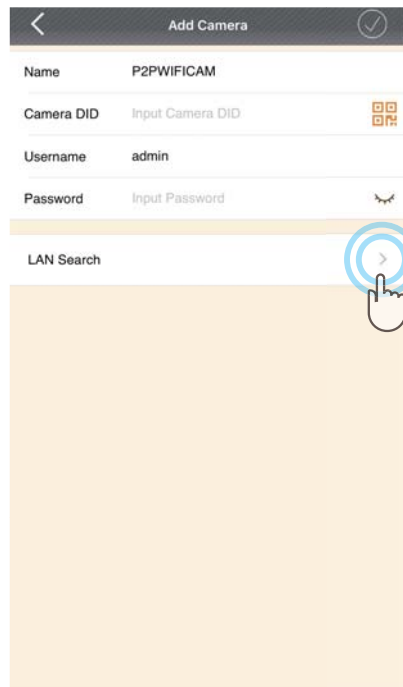

1. Click on **[Add Camera]**.

2. Click on **[Add the cameras which are already connected to your WiFi network]**.

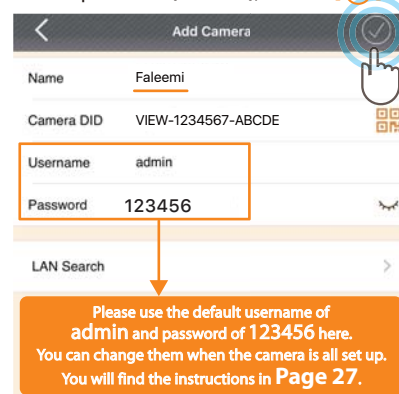

3. Click on **[LAN Search]**.

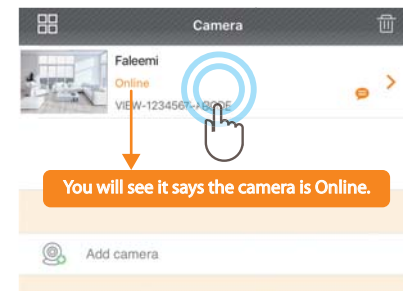

4. Click on the camera searched.

If you don't find it, Please Make sure your phone is connected to your WiFi (not cellular data) and click on this icon to refresh.

5. Give your camera a name, and put the default password **(123456)**, click on **[✓]**.

Name   Faleemi
Camera DID   VIEW-1234567-ABCDE
Username   admin
Password   123456
LAN Search

Please use the default username of **admin** and password of **123456** here.
You can change them when the camera is all set up.
You will find the instructions in **Page 27**.

6. You will see it says the camera is **Online**. Congratulations! Your camera is all set up. **Click on the image** to enjoy viewing and controlling it now.

You will see it says the camera is Online.

☺ Congratulations!
Your camera is connected now

⚠ 1. To ensure the security of your camera, you are suggested changing the default password. Please refer to the instruction in **Page 27**.
2. You can relocate the camera now. Please just unplug it and move it to the new location and plug it in, the camera will connect to your WiFi automatically, no need to set it up again.
* But please make sure the new location will be not far from your router.
